
Batch timing

How long each batch stays at its best in the freezer. This is a flavour window, not a safety one — nothing here spoils, it fades. Where a single ingredient sets the clock, it is named.

3+ months 10 RECIPES

Negroni	VERMOUTH	Gin and Campari keep indefinitely — the sweet vermouth's freshness at batching sets the ceiling.
Manhattan	VERMOUTH	Batch with vermouth opened in the last 4–6 weeks; that freshness, not the whiskey, is the limit.
Old Fashioned	—	Bourbon, syrup, and bitters only — nothing here degrades in the freezer.
Boulevardier	VERMOUTH	Improves after a week in the freezer; the sweet vermouth's freshness sets the ceiling.
Dirty Martini	VERMOUTH	Dry vermouth oxidizes faster than sweet, so batch from a recently opened bottle; the brine itself keeps.
Vesper	VERMOUTH	Cocchi Americano is an aromatized wine like vermouth — its freshness is the limit, not the spirits.
Vieux Carré	VERMOUTH	Rye, cognac, and Bénédictine keep indefinitely; the sweet vermouth is the clock.
Hanky-Panky	VERMOUTH	Fresh sweet vermouth is critical — replace a bottle open more than four weeks before batching.
Sazerac	—	Rye and rich simple syrup only — nothing in here has a clock.
Bijou	VERMOUTH	Gin and Chartreuse are indefinite; the sweet vermouth's freshness sets the limit.

2-3 weeks 7 RECIPES

Margarita	CITRUS	Fresh lime is the clock here — brightest in the first two to three weeks.
Cosmopolitan	CITRUS	Lime and cranberry juice both fade; brightest in the first two to three weeks.
Moscow Mule	CITRUS	Fresh lime sets the window; the ginger syrup outlasts it.
Espresso Martini	COFFEE	Cold brew concentrate, not fresh espresso, is what buys this weeks instead of days.
Paper Plane	CITRUS	Lemon juice is the clock; the three amari would keep for months on their own.
Daiquiri	CITRUS	Fresh lime stays bright for 2-3 weeks in the freezer.
Mint Julep	MINT	The mint is brightest in the first week; strained into syrup and held at high proof, it keeps its lift for two to three.

5-7 days 1 RECIPE

Aviation	CITRUS	The lemon juice mellows quickly; it peaks in the first 48 hours.
